GENERAL CONDITIONS

Definitions:

"Administration" means the Government of the State whose flag the Ship is entitled to fly or under whose authority the Ship is authorised to operate in the specific case.

"IACS" means the International Association of Classification Societies.

"Interested Party" means the party, other than the Society, having an interest in or responsibility for the Ship, product, plant or system subject to classification or certification (such as the owner of the Ship and his representatives, the ship builder, the engine builder or the supplier of parts to be tested) who requests the Services or on whose behalf the Services are requested.

"Owner" means the registered owner, the ship owner, the manager or any other party with the responsibility, legally or contractually, to keep the ship seaworthy or in service, having particular regard to the provisions relating to the maintenance of class laid down in Part A, Chapter 2 of the Rules for the Classification of Ships or in the corresponding rules indicated in the specific Rules.

"Rules" in these General Conditions means the documents below issued by the Society:

- (i) Rules for the Classification of Ships or other special units;
- (ii) Complementary Rules containing the requirements for product, plant, system and other certification or containing the requirements for the assignment of additional class notations;
- (iii) Rules for the application of statutory rules, containing the rules to perform the duties delegated by Administrations;
- (iv) Guides to carry out particular activities connected with Services;
- (v) Any other technical document, as for example rule variations or interpretations.

"Services" means the activities described in Article 1 below, rendered by the Society upon request made by or on behalf of the Interested Party.

"Ship" means ships, boats, craft and other special units, as for example offshore structures, floating units and underwater craft.

"Society" or "TASNEEF" means Tasneef and/or all the companies in the Tasneef Group which provide the Services.

"Surveyor" means technical staff acting on behalf of the Society in performing the Services.

Article 1

1.1. The purpose of the Society is, among others, the classification and certification of ships and the certification of their parts and components. In particular, the Society:

- (i) sets forth and develops Rules;
- (ii) publishes the Register of Ships;
- (iii) issues certificates, statements and reports based on its survey activities.

1.2. The Society also takes part in the implementation of national and international rules and standards as delegated by various Governments.

1.3. The Society carries out technical assistance activities on request and provides special services outside the scope of classification, which are regulated by these general conditions, unless expressly excluded in the particular contract.

Article 2

2.1. The Rules developed by the Society reflect the level of its technical knowledge at the time they are published. Therefore, the Society, although committed also through its research and development services to continuous updating of the Rules, does not guarantee the Rules meet state-of-the-art science and technology at the time of publication or that they meet the Society's or others' subsequent technical developments.

2.2. The Interested Party is required to know the Rules on the basis of which the Services are provided. With particular reference to Classification Services, special attention is to be given to the Rules concerning class suspension, withdrawal and reinstatement. In case of doubt or inaccuracy, the Interested Party is to promptly contact the Society for clarification.

The Rules for Classification of Ships are published on the Society's website: www.tasneef.ae.

2.3. The Society exercises due care and skill:

- (i) in the selection of its Surveyors
- (ii) in the performance of its Services, taking into account the level of its technical knowledge at the time the Services are performed.

2.4. Surveys conducted by the Society include, but are not limited to, visual inspection and non-destructive testing. Unless otherwise required, surveys are conducted through sampling techniques and do not consist of comprehensive verification or monitoring of the Ship or of the items subject to certification. The surveys and checks made by the Society on board ship do not necessarily require the constant and continuous presence of the Surveyor. The Society may also commission laboratory testing, underwater inspection and other checks carried out by and under the responsibility of qualified service suppliers. Survey practices and procedures are selected by the Society based on its experience and knowledge and according to generally accepted technical standards in the sector.

Article 3

3.1. The class assigned to a Ship, like the reports, statements, certificates or any other document or information issued by the Society, reflects the opinion of the Society concerning compliance, at the time the Service is provided, of the Ship or product subject to certification, with the applicable Rules (given the intended use and within the relevant time frame).

The Society is under no obligation to make statements or provide information about elements or facts which are not part of the specific scope of the Service requested by the Interested Party or on its behalf.

3.2. No report, statement, notation on a plan, review, Certificate of Classification, document or information issued or given as part of the Services provided by the Society shall have any legal effect or implication other than a representation that, on the basis of the checks made by the Society, the Ship, structure, materials, equipment, machinery or any other item covered by such document or information meet the Rules. Any such document is issued solely for the use of the Society, its committees and clients or other duly authorised bodies and for no other purpose. Therefore, the Society cannot be held liable for any act made or document issued by other parties on the basis of the statements or information given by the Society. The validity, application, meaning and interpretation of a Certificate of Classification, or any other document or information issued by the Society in connection with its Services, is governed by the Rules of the Society, which is the sole subject entitled to make such interpretation. Any disagreement on technical matters between the Interested Party and the Surveyor in the carrying out of his functions shall be raised in writing as soon as possible with the Society, which will settle any divergence of opinion or dispute.

3.3. The classification of a Ship, or the issuance of a certificate or other document connected with classification or certification and in general with the performance of Services by the Society shall have the validity conferred upon it by the Rules of the Society at the time of the assignment of class or issuance of the certificate; in no case shall it amount to a statement or warranty of seaworthiness,

structural integrity, quality or fitness for a particular purpose or service of any Ship, structure, material, equipment or machinery inspected or tested by the Society.

3.4. Any document issued by the Society in relation to its activities reflects the condition of the Ship or the subject of certification or other activity at the time of the check.

3.5. The Rules, surveys and activities performed by the Society, reports, certificates and other documents issued by the Society are in no way intended to replace the duties and responsibilities of other parties such as Governments, designers, ship builders, manufacturers, repairers, suppliers, contractors or sub-contractors, Owners, operators, charterers, underwriters, sellers or intended buyers of a Ship or other product or systemsurveyed.

These documents and activities do not relieve such parties from any fulfilment, warranty, responsibility, duty or obligation (also of a contractual nature) expressed or implied or in any case incumbent on them, nor do they confer on such parties any right, claim or cause of action against the Society. With particular regard to the duties of the ship Owner, the Services undertaken by the Society do not relieve the Owner of his duty to ensure proper maintenance of the Ship and ensure seaworthiness at all times. Likewise, the Rules, surveys performed, reports, certificates and other documents issued by the Society are intended neither to guarantee the buyers of the Ship, its components or any other surveyed or certified item, nor to relieve the seller of the duties arising out of the law or the contract, regarding the quality, commercial value or characteristics of the item which is the subject of transaction.

In no case, therefore, shall the Society assume the obligations incumbent upon the above-mentioned parties, even when it is consulted in connection with matters not covered by its Rules or other documents.

In consideration of the above, the Interested Party undertakes to relieve and hold harmless the Society from any third party claim, as well as from any liability in relation to the latter concerning the Services rendered.

Insofar as they are not expressly provided for in these General Conditions, the duties and responsibilities of the Owner and Interested Parties with respect to the services rendered by the Society are described in the Rules applicable to the specific Service rendered.

Article 4

4.1. Any request for the Society's Services shall be submitted in writing and signed by or on behalf of the Interested Party. Such a request will be considered irrevocable as soon as received by the Society and shall entail acceptance by the applicant of all relevant requirements of the Rules, including these General Conditions. Upon acceptance of the written request by the Society, a contract between the Society and the Interested Party is entered into, which is regulated by the present General Conditions.

4.2. In consideration of the Services rendered by the Society, the Interested Party and the person requesting the service shall be jointly liable for the payment of the relevant fees, even if the service is not concluded for any cause not pertaining to the Society. In the latter case, the Society shall not be held liable for non-fulfilment or partial fulfilment of the Services requested. In the event of late payment, interest at the legal current rate increased by 1.5% may be demanded.

4.3. The contract for the classification of a Ship or for other Services may be terminated and any certificates revoked at the request of one of the parties, subject to at least 30 days' notice to be given in writing. Failure to pay, even in part, the fees due for Services carried out by the Society will entitle the Society to immediately terminate the contract and suspend the Services.

For every termination of the contract, the fees for the activities performed until the time of the termination shall be owed to the Society as well as the expenses incurred in view of activities already programmed; this is without prejudice to the right to compensation due to the Society as a consequence of the termination.

With particular reference to Ship classification and certification, unless decided otherwise by the Society, termination of the contract implies that the assignment of class to a Ship is withheld or, if already assigned, that it is suspended or withdrawn; any statutory certificates issued by the Society will be withdrawn in those cases where provided for by agreements between the Society and the flag State.

Article 5

5.1. In providing the Services, as well as other correlated information or advice, the Society, its Surveyors, servants or agents operate with due diligence for the proper execution of the activity. However, considering the nature of the activities performed (see art. 2.4), it is not possible to guarantee absolute accuracy, correctness and completeness of any information or advice supplied. Express and implied warranties are specifically disclaimed.

Therefore, except as provided for in paragraph 5.2 below, and also in the case of activities carried out by delegation of Governments, neither the Society nor any of its Surveyors will be liable for any loss, damage or expense of whatever nature sustained by any person, in tort or in contract, derived from carrying out the Services.

5.2. Notwithstanding the provisions in paragraph 5.1 above, should any user of the Society's Services prove that he has suffered a loss or damage due to any negligent act or omission of the Society, its Surveyors, servants or agents, then the Society will pay compensation to such person for his proved loss, up to, but not exceeding, five times the amount of the fees charged for the specific services, information or opinions from which the loss or damage derives or, if no fee has been charged, a maximum of AED5,000 (Arab Emirates Dirhams Five Thousand only). Where the fees charged are related to a number of Services, the amount of the fees will be apportioned for the purpose of the calculation of the maximum compensation, by reference to the estimated time involved in the performance of the Service from which the damage or loss derives. Any liability for indirect or consequential loss, damage or expense is specifically excluded. In any case, irrespective of the amount of the fees charged, the maximum damages payable by the Society will not be more than AED5,000,000 (Arab Emirates Dirhams Five Millions only). Payment of compensation under this paragraph will not entail any admission of responsibility and/or liability by the Society and will be made without prejudice to the disclaimer clause contained in paragraph 5.1 above.

5.3. Any claim for loss or damage of whatever nature by virtue of the provisions set forth herein shall be made to the Society in writing, within the shorter of the following periods: (i) THREE (3) MONTHS from the date on which the Services were performed, or (ii) THREE (3) MONTHS from the date on which the damage was discovered. Failure to comply with the above deadline will constitute an absolute bar to the pursuit of such a claim against the Society.

Article 6

6.1. These General Conditions shall be governed by and construed in accordance with United Arab Emirates (UAE) law, and any dispute arising from or in connection with the Rules or with the Services of the Society, including any issues concerning responsibility, liability or limitations of liability of the Society, shall be determined in accordance with UAE law. The courts of the Dubai International Financial Centre (DIFC) shall have exclusive jurisdiction in relation to any claim or dispute which may arise out of or in connection with the Rules or with the Services of the Society.

6.2. However,

- (i) In cases where neither the claim nor any counterclaim exceeds the sum of AED300,000 (Arab Emirates Dirhams Three Hundred Thousand) the dispute shall be referred to the jurisdiction of the DIFC Small Claims Tribunal; and
- (ii) for disputes concerning non-payment of the fees and/or expenses due to the Society for services, the Society shall have the

right to submit any claim to the jurisdiction of the Courts of the place where the registered or operating office of the Interested Party or of the applicant who requested the Service is located.

In the case of actions taken against the Society by a third party before a public Court, the Society shall also have the right to summon the Interested Party or the subject who requested the Service before that Court, in order to be relieved and held harmless according to art. 3.5 above.

Article 7

7.1. All plans, specifications, documents and information provided by, issued by, or made known to the Society, in connection with the performance of its Services, will be treated as confidential and will not be made available to any other party other than the Owner without authorisation of the Interested Party, except as provided for or required by any applicable international, European or domestic legislation, Charter or other IACS resolutions, or order from a competent authority. Information about the status and validity of class and statutory certificates, including transfers, changes, suspensions, withdrawals of class, recommendations/conditions of class, operating conditions or restrictions issued against classed ships and other related information, as may be required, may be published on the website or released by other means, without the prior consent of the Interested Party.

Information about the status and validity of other certificates and statements may also be published on the website or released by other means, without the prior consent of the Interested Party.

7.2. Notwithstanding the general duty of confidentiality owed by the Society to its clients in clause 7.1 above, the Society's clients hereby accept that the Society may participate in the IACS Early Warning System which requires each Classification Society to provide other involved Classification Societies with relevant technical information on serious hull structural and engineering systems failures, as defined in the IACS Early Warning System (but not including any drawings relating to the ship which may be the specific property of another party), to enable such useful information to be shared and used to facilitate the proper working of the IACS Early Warning System. The Society will provide its clients with written details of such information sent to the involved Classification Societies.

7.3. In the event of transfer of class, addition of a second class or withdrawal from a double/dual class, the Interested Party undertakes to provide or to permit the Society to provide the other Classification Society with all building plans and drawings, certificates, documents and information relevant to the classed unit, including its history file, as the other Classification Society may require for the purpose of classification in compliance with the applicable legislation and relative IACS Procedure. It is the Owner's duty to ensure that, whenever required, the consent of the builder is obtained with regard to the provision of plans and drawings to the new Society, either by way of appropriate stipulation in the building contract or by other agreement.

In the event that the ownership of the ship, product or system subject to certification is transferred to a new subject, the latter shall have the right to access all pertinent drawings, specifications, documents or information issued by the Society or which has come to the knowledge of the Society while carrying out its Services, even if related to a period prior to transfer of ownership.

Article 8

8.1. Should any part of these General Conditions be declared invalid, this will not affect the validity of the remaining provisions.

INDEX

1 GENERAL

These Rules set the minimum requirements for approval and certification of workshop providing services such as onboard repair, maintenance of equipment and is applicable to both initial and renewal audits.

1.1 Definitions

- Workshop: A person or company, not employed by Tasneef, who at the request of an equipment manufacturer, shipyard, vessel's owner or other client acts in connection with onboard repair and provides services for a ship or a mobile offshore unit such as measurements, tests or maintenance of safety systems and equipment.

- Agent: A Person or Company authorised to act for or to represent a Manufacturer or approved/recognized workshop.

- Subsidiary: A Company partly or wholly owned by a Manufacturer or approved/recognized workshop.

- Subcontractor: A Person or Company providing services to a Manufacturer, with a formal contract defining the assumption of the obligations of the workshop.

1.2 Application

These Rules apply to the approval of the workshop engaged in different activities related to ship onboard repair, maintenance of equipment.

1.3 Equivalence with other standards

In general, the application of these Rules is in compliance with other national/ international requirements.

1.4 Voluntary certification

Such firms may request Tasneef to certify them as workshop on a voluntary basis.

2 PROCEDURES FOR APPROVAL AND CERTIFICATION

2.1 Application and documentation

For approval, the company has to submit an application to Tasneef specifying the scope for which approval is required and enclosing:

- 1) outline of company, e.g. organisation and management structure, including subsidiaries to be included in the approval/certification;
- 2) list of nominated agents, subsidiaries and subcontractors;
- 3) experience of the company in the specific service area;
- 4) Authorization from manufacturers, manufacturer's documentary evidence that the work shop has been authorized or licensed to service the particular makes and models of equipment for which approval is sought shall be provided;
- 5) list of operators, technicians and inspectors documenting training and experience within the

relevant service area, and qualifications according to recognised national, international or industry standards, as relevant;

- 6) description of equipment used for the particular service for which approval is sought;
- 7) guide for operators of such equipment;
- 8) training programs for operators, technicians and inspectors;
- 9) checklists and record formats for recording results of the services carried out;
- 10) Quality Manual and/or documented procedures used for assuring the quality of the services
- 11) documented procedures for communication with the crew prior to commencing work, so that it is safe to decommission the equipment being maintained, and to provide a safe system of work in place;
- 12) evidence of approval/acceptance by other bodies, if any;
- 13) information on any other activities which may present a conflict of interest;
- 14) record of customer claims and of corrective actions requested by certification bodies.

2.2 General requirements

2.2.1 Extent of approval

The workshop is to demonstrate, as required by [2.2.2] to [2.2.9] that he has the competence and control needed to perform the services for which approval is sought.

2.2.2 Training of personnel

The workshop is responsible for the qualification and training of its personnel to a recognised national, international or industry standard as applicable. Where such standards do not exist, the workshop is to define standards for the training and qualification of its personnel relevant to the functions they are authorised to perform.

The personnel are also to have adequate experience and be familiar with the operation of any necessary equipment.

Operators/technicians/inspectors are to have had a minimum of one year tutored on-the-job training.

Where it is not possible to perform internal training, a program of external training may be considered acceptable.

2.2.3 Supervision

The workshop is to provide supervision for all services provided. The supervisor responsible is to have had a minimum of two years of experience as an operator/technician/ inspector in the activity for which the workshop is approved.

For a workshop consisting of one person, that person is to meet the requirements of a supervisor.

2.2.4 Personnel records

The workshop is to keep records of the approved

Rules for Certification of Workshop

operators, technicians and inspectors. The record is to contain information on age, formal education, training and experience in the services for which they are approved.

2.2.5 Equipment and facilities

The workshop is to have the necessary equipment and facilities for the service to be provided. A record of the equipment used is to be kept and available. The record is to contain information on maintenance and results of calibration and verifications. Tasneef is to assess and record the validity of previous measuring results when the equipment is found not to conform to requirements. Tasneef is to take appropriate action on the equipment affected.

2.2.6 Control of data

When computers are used for the acquisition, processing, recording, reporting, storage, measurement assessment and monitoring of data, the ability of computer software to satisfy the intended application is to be documented and confirmed by the workshop. This is to be undertaken prior to initial use and reconfirmed as necessary.

Note 1: Commercial off-the-shelf software (e.g. word processing, database and statistical program) in general use within their designed application range may be considered to be sufficiently validated and do not require any subsequent confirmation.

2.2.7 Where several servicing stations are owned by a given company, each station is to be assessed and approved except as specified in [2.5.3].

2.2.8 Procedures

The workshop is to have documented work procedures covering all services supplied.

2.2.9 Subcontractors

The workshop is to give information of agreements and arrangements if any parts of the services provided are subcontracted. Particular emphasis is to be given to quality management by the workshop in following-up of such subcontracts.

Subcontractors providing anything other than equipment are also to meet the requirements of these Rules (see [2.2] and [2.5]).

2.2.10 Verification

The workshop is to verify that the services provided (including those supplied by subcontractors) are carried out in accordance with approved procedures.

2.2.11 Reporting

The report should detail the results of measurements, tests, maintenance and/or repairs carried out. Further instructions may be given in Appendixes.

Documented procedures and instructions are to be available for the recording of damages and defects found during inspection, servicing and repair work. This documentation is to be made available upon request.

2.3 Auditing of the workshop

Subject to the satisfactory outcome of the review of the documents submitted, the workshop is audited in order to ascertain that it is duly organised and managed in accordance with the submitted documents, and that it is capable of conducting the services for which approval/certification is sought.

2.4 Service performance

Certification is conditional on a practical demonstration of the performance. This performance may be demonstrated during the supply of an actual service or by a simulated service, provided the simulation is fully representative of an actual service.

At renewal audits, evidence of performance may be waived if the surveyor has witnessed any actual service satisfactorily since last initial/renewal audit.

2.5 Quality System

2.5.1 The workshop is to have a documented system covering at least the following:

- 1) code of conduct of the relevant activity;
- 2) maintenance and calibration of equipment;
- 3) training program for operators/ technicians/ inspectors;
- 4) supervision and verification of operations to ensure compliance with the approved operational procedures;
- 5) recording and reporting of information;
- 6) quality management of subsidiaries, agents and subcontractors;
- 7) job preparation;
- 8) periodical review of work process procedures, complaints, corrective actions, and issuance, maintenance and control of documents.

2.5.2 A documented Quality system complying with the most current version of ISO 9000 Series and including the above items, would be considered acceptable.

2.5.3 If a manufacturer of equipment (and/or its workshop) applies for inclusion of its nominated agents and/or subsidiaries in the approval, then it is to have implemented a quality system certified in accordance with the most current version of ISO 9000 series. The quality system is to contain effective controls of the manufacturer's (and/or workshop's) agents and/or subsidiaries. The nominated agents/subsidiaries also are to have in place an equally effective quality system complying with the most current version of ISO 9000 series. Such approvals are to be based upon an evaluation of the quality system implemented by the parent company against the most current version of ISO 9000 series. Tasneef may require follow-up audits on such agents or subsidiaries against the most current version of ISO 9000 series to confirm adherence to this quality system.

2.6 Workshop relations with equipment manufacturers

2.6.1 Workshop working as service station for a

Rules for Certification of Workshop

manufacturer

A workshop which works as a service station for manufacturer(s) of equipment is to be assessed by the manufacturer(s) and nominated as their agent.

The manufacturer is to ensure that appropriate instruction manuals, materials etc. are available for the agent and that the agent's technicians are properly trained.

Such workshops are to be approved either on a case-by-case basis, or in accordance with [2.5.3].

3 CERTIFICATION

3.1 Issuance of the certificate

Upon satisfactory completion of both the audit of the workshop and the demonstration test, as applicable, may issue a Certificate of Approval stating that the workshop operation system has been found to be satisfactory and that the results of services performed in accordance with that system may be accepted.

The Certificate is to clearly state the type and scope of services and any limitations or restrictions imposed, including type of equipment and/or names of Manufacturers of equipment where this is a limiting restraint.

The certificate format is given in Annex 1.

3.2 Validity and renewal of the certificates

The Certificate is to be renewed at intervals of three years by verification through an audit similar to the approval one that the approved original conditions are maintained or, where applicable, on expiry of the workshop's approval received from an equipment

Manufacturer, whichever comes first. In the latter case, Tasneef is to be informed in due course by the workshop.

The certificate validity is subject to the satisfactory results of unscheduled audits and/or of other type of monitoring, such as the check of a supplied service after its completion.

The renewal audits are to be performed before the expiring date of the certificate. Prolongation of the validity of the certificates beyond the expiring date is not allowed.

3.3 Meaning of the Certification

The certification process of a Supplier from is to be considered as a preliminary verification that the workshop has the capability and facilities to supply adequate services.

4 WORKSHOP'S OBLIGATIONS

When any alteration to the certified service operating system of the workshop is made, is to be immediately notified of this. In such case, a re-audit may be required when deemed necessary by Tasneef.

5 SUSPENSION AND CANCELLATION OF APPROVAL

5.1 Services improperly carried out

Where evidence is given that services were improperly carried out or the results were improperly reported, reserves the right to carry out additional verifications at the Supplier and to take appropriate actions such as the suspension or in case of willful acts or omissions the cancellation of the certificate as specified in [5.2] and [5.3].

5.2 Suspension of the approval

Approval may be suspended in the following cases:

- 1) where the service was improperly carried out or the results were improperly reported;
- 2) where deficiencies are found in the operating system of the workshop;
- 3) where alterations have been made to the Company's Quality System relevant to the workshop certificates, without written notification to Tasneef.
- 4) where a required periodical audit has not been carried out as requested;
- 5) where the due fees have not been paid.

5.3 Cancellation of the approval

Approval may be cancelled in the following cases:

- 1) in the same cases as in [5.1] above, where major serious deficiencies are found;
- 2) in the same cases as in [5.1] above, where the workshop does not implement the corrective actions to the found deficiencies in the time agreed with
- 3) where willful acts or omissions are ascertained
- 4) where any deliberate misrepresentation has been made by the workshop.

5.4 Workshops with certificates suspended,

Workshops whose approval certificates were cancelled or expired are to be considered as not certified. Workshops whose approval certificates were suspended are to be considered as not certified for all the period of suspension of the certificate. Such workshops can be used again as soon as the reason for the suspension have been removed.

5.5 Transparency

In case of cancellation or suspension of the certification Tasneef reserves the right to inform the relevant authorities accordingly.

5.6 Reintegration of certificates suspended or cancelled

A certificate suspended in the cases (1), (2) and (3) as specified in [5.2] may be reintegrated after an audit or documental verification, to satisfaction, in order to ascertain that the reason of suspension have been removed.

A certificate suspended in the cases (4) and (5) as specified in [5.2] is automatically reintegrated as soon as the deficiency has been corrected.

Rules for Certification of Workshop

A workshop whose approval was cancelled may apply for re-approval only after it has corrected the nonconformities which resulted in cancellation, and it can assure the full control of the service operating system.

Expiration or cancellation of the workshop's parent company approval automatically invalidates approval of all agents and subsidiaries if these are certified according to [2.5.3].

A new certificate will be issued by only after a satisfactory verification of the corrective actions implemented, during an audit at the workshop equivalent to the one for the first approval.

A new certificate cannot be granted to a workshop whose approval has been cancelled due to violation of code of ethics [2.5] (1) or willful acts or omissions [5.3] (3).

5.7 Additional periodical verifications

In the case a new certificate is granted to a workshop whose certificate was cancelled, Tasneef reserves the right to perform additional verifications and checks for the period of the validity of the new certificate issued after the cancellation, as for instance scheduled or unscheduled audits or verifications of the services already supplied.

6 SPECIFIC REQUIREMENTS

Specific requirements depending on the types of services being provided by the workshop would be ascertained on case by case basis.

General conditions for the approval

- a) The initial conditions verified by Tasneef at the time of the approval are to be maintained;
- b) Any changes to the initial conditions are to be promptly communicated to Tasneef, which reserves the right to repeat the relevant assessments;
- c) Tasneef personnel are to be allowed to witness during the performance of activities, upon their request;
- d) The activities are to be carried out in compliance with the TASNEEF Rules and or other applicable rules;
- e) Tasneef may revoke the approval at any moment in the case of modifications to requirements or conditions for the approval.
