

Amendments to the Rules for the Certification of Lifts and Escalators for Passengers and Crew Members

Effective from 1 July 2016

Amendments to the Rules for the Certification of Lifts and Escalators for Passengers and Crew Members

Chapter 9 - ELECTRICAL INSTALLATION FOR LIFTS

The following requirements either supersede those indicated in the Rules with the same number or are new. The additions are underlined and deletions stricken through.

Modify item [9.2] of Chapter 9 as follows:

9.1 GENERAL

Electrical installations of lifts are to comply, as far as applicable, with the Safety rules for the construction and installation of lifts and service lifts - Electric lifts (UNI EN 81-1) and Hydraulic lifts (EN 81-2), and this is to result from a statement by the Manufacturer, who is to have a Quality System recognised as suitable by Tasneef. In addition to the above, the requirements contained in the following parts of Chapter 9 are to be complied with.

9.2 ELECTRICAL DEVICES

Electrical devices are to comply with the relevant requirements of CEI and IEC standards and with those of IEC Publication 60092 series concerning Electrical electrical installations on board ships.

The electronic components for control, protection and alarm are to be constructed to withstand type tests required in IEC Publication 60092-504; a Statement issued by the Manufacturer may be accepted for this purpose.
